3. Resolution No.1575 of the 58<sup>th</sup> Meeting of the Board of Management held on 04.12.2017 of SVU.

:-:oOo:-

In an effort to conserve the native breed, it is required to assess the genetic and phenotypic status of existing herd of Punganur Cattle which is the need of the hour. The same thing was emphasized by the Special Chief Secretary, AHDD & F. Govt. of Andhra Pradesh and directed the University to take up production of Punganur cows in a big way by using latest reproductive biotechnological tools and also informed to produce about 5,000 Punganur animals with in next 5 years to prevent the breed from extinction. Before start using these reproductive biotechnological tools, it is required to assess the available germplasm to include them as donors for the designated breeding programme.

Dr.  
21/12

Based on the deliberations held on 08.09.2017 at Livestock Research Station, Lam. Guntur and in view of growing importance to conserve native breeds, a detailed project entitled "Assessment of Genetic and phenotypic status of Punganur Cattle in A.P" was developed by the group of scientists under the leadership of University head of AGB and submitted to University to accord sanction to carryout technical programme for 3 years and also requested for allotment of budget as detailed below. This study is required to identify proper Punganur breed cattle for further multiplication and conservation.
